// R&D FUNDING FOR COMPANIES · WROCŁAW

grant-radar

We win R&D grants. You pay when we win.

Most Polish firms never apply for an R&D grant: they have no lab and nobody to write the application. **We bring both**, run the project after the award, and take a share of the grant only if the company wins.

Problem

Polish R&D grants go to the same firms again and again. **1 in 500** firms has ever won one, and 56% of first-time winners win again. The first grant is the hard one: Ścieżka SMART funds 1 in 7 applications, and many calls require a research partner a small firm does not have.

WHO IT IS FOR

Companies with an R&D idea
a project worth funding, but no grant yet and no lab

Grant advisers
cases that need a university lab come to us

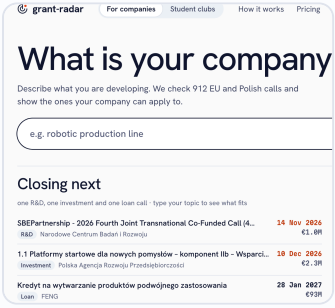

Students and research clubs
free; this is how we meet the researchers

Solution

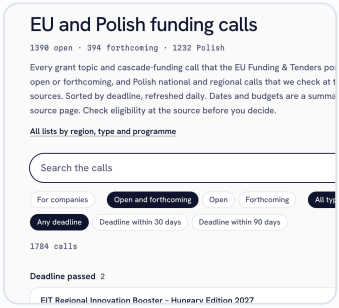

One team instead of three: **an adviser, a university and a project office.**

Check	Free. We tell the company whether its project can win, and in which call
Lab	Researchers from a Polish university as a subcontractor; the company owns the results
Application	We write it with the lab. Nothing to pay up front
Project	Budget, expenses, reports and payment claims until the last payment
Price	A share of the grant, paid only if it is awarded

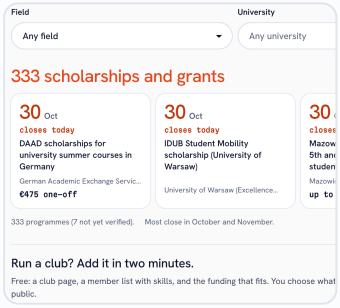

What already works

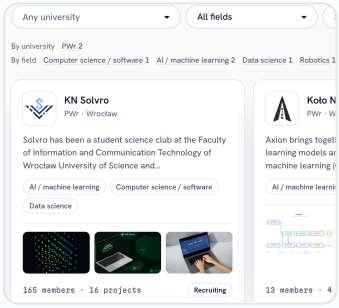

Project check
a company describes its project in one sentence and sees where it qualifies

Call search
EU and Polish calls in one place, with deadlines and budgets

Scholarships
students see only the ones they can actually apply for

Student clubs
Solvro and Axion at PWr run their club pages here
